Profile Summary

Experienced Java Developer with 5+ years of expertise in designing and developing robust, scalable applications. Proficient in **Spring Framework (Core, MVC, JPA, AOP)**, **Spring Boot**, and **J2EE technologies**, I leverage Java's versatility to deliver solutions that align with complex business requirements. Highly skilled in **Microservices architecture**, **JMS**, and **Apache Kafka**, ensuring seamless communication and data processing across distributed systems. Adept in advanced testing methodologies using **JUnit** and **Mockito**, maintaining a strong focus on quality assurance and efficient software delivery. Extensive experience in web technologies including **JavaScript, Node.js, CSS, React.js**, enabling the development of dynamic, responsive, and secure web applications.

Complemented by a strong foundation in **database technologies** (MySQL, Oracle SQL/PLSQL), **embedded systems**, and proficiency in multiple programming languages (C, C++, Python, R) .With a solid academic background and a passion for solving complex problems, I am committed to driving innovation and continuous improvement in challenging and fast-paced projects.

Core technical skills.

- Core Java & J2EE
- Spring Framework Modules (Core, MVC, Hibernate, JDBC, AOP)
- Spring Boot
- Apache Camel
- Junit & Mockito
- Maven
- JSP and React.js
- Android development
- Oracle SQL, Oracle PLSQL
- Spring Cloud and Microservices
- JMS, Kafka, Docker.

Other technical skills.

- HTML, CSS3, Bootstrap 5
- JavaScript, Node.js, ext.js
- Embedded systems
- Arduino, ESP8266
- Android development
- C, C++, Python, R.
- DSA, DBMS, OS and Computer Networks

Soft Skills

- Communicator
- Planner
- Innovator
- Intuitive

Education

- **B. Tech:** KIIT University; CGPA-8.43 **(2020)**
- **12th Grade DAV Model Durgapur (2016)**
- **10th Grade St Xaviers Durgapur (2014)**

Extra-curricular

- **YouTube channel:** Where I teach Java and DSA (link)
- **Pianist and Indian classical vocals.**

Professional Experience

Infosys – (December'24 – Present)

- Collaborated with one of Infosys's largest fintech clients in the retail banking domain.
- Led the modernization of a legacy Java monolithic application by migrating it to a microservices-based architecture using Spring Boot.
- Conducted in-depth code investigations to analyze and understand existing application functionality before migration.
- Designed low-level components, created database schemas, and visualized architecture from a mainframe-based system.
- Performed unit testing with JUnit, resolved SIT and integration issues, and analyzed/debugged GCP logs to ensure system reliability.

Nomura – (August'20 – December'24)

- Spearheaded the development and integration of new requirements into enterprise web applications for broker back-office solutions, leveraging technologies including Spring Core, Spring MVC / Spring Boot, Apache Camel DSL, and JSP.
- Conducted debugging, manual code examination, and analysis, along with proficient preparation of database scripts using PLSQL.
- Successfully identified and resolved root causes of critical and unexpected behavior within applications.
- Innovated and engineered various helper tools utilizing J2EE, Spring Boot, Spring REST API, Excel VBA, and PLSQL, optimizing internal organizational tasks.
- Collaborated on interfacing with external systems, including the conversion of DE files from International Banks and messages from Australian Clearing houses.

Projects

Organization level:

- NAM (Nomura Asset management), CBJ (Custody Bank of Japan), AUSIEX (Australian Investment Exchange Limited), SMTB (Sumitomo Trust Bank), MIZUHO BANK, ISO (International Organization for Standardization) used tech stack such as Core Java, Spring MVC, Spring Boot, Spring REST API, Apache Camel, Oracle SQL.

Self-Made:

- Supply Chain Traceability System Using Block Chain: For end users to detect whether there has been any tamper of the perishable food items they bought in its supply chain tech stack used Block Chain using JAVA and Spring Boot and ORM tools such as JPA, MySQL.
